Bemsee & ZXMOTO Racing Project

ZXMOTO Racing UK is the official UK race technical partner for ZXMOTO, responsible for technical development, race preparation, and the supply of race machinery and parts for the ZXMOTO racing programme.

Our primary focus is the development of the 500RR and 820RR-R, with both models being developed specifically for the demands of competitive UK racing.

The project is supported by MSS Performance, bringing together extensive experience in motorcycle racing, technical development, and race preparation to help develop and optimise ZXMOTO machinery for the UK market and racing environment.

However, our ambitions extend beyond competition at the highest level.

Through the Bemsee and ZXMOTO Racing Project, we are excited to offer dedicated race packages for both the 500RR and 820RR-R.

Whether you're an experienced club racer looking for a competitive package or a rider taking your first steps into motorcycle racing, our aim is to provide a platform that supports your ambitions and helps you progress on track. Novice licence holders are only eligible to race the 500RR.

Our packages are designed to make getting on the grid more accessible, with technical support and exclusive discounts on race parts available to project riders.

From starting your racing journey to developing your performance on track, the Bemsee and ZXMOTO Racing Project is here to support you every step of the way.

CHAMPIONSHIP ELIGIBILITY

ZXMOTO 500RR: BMCRC Open 500 Championship

ZXMOTO 820RR-R: MRO600/New Era Supersport and MRO Clubman 600.

Terms and Conditions

The Bemsee/ZX Moto Project will deliver a race ready bike that is eligible for BMCRC series.

The lead time for bike delivery from placing an order before the end of December should be during February, subject to freight arrivals from China. The bike is supplied via MSS Performance, Thorpe-Le-Soken, Essex.

The package price is offered on the basis that the bike only races in Bemsee series within the 2027 race season. Practice use at trackdays and testdays elsewhere is permitted. This restriction will remain in place for the 2027 race season after which the bike may be raced elsewhere. Requests to race bikes as Wild Cards in other series will be considered on request.

If the bike is raced at any series other than BMCRC without permission, then an additional charge will be levied of £2500 plus VAT. This represents the negotiated discounts that have been passed onto customers within the Bemsee/ZX Moto Project.

An order is placed on receipt of a 50% deposit and acceptance of terms (these are detailed on the invoice) The balance is due on/prior to the collection of the new bike.
