

Bemsee Paddock Tannoy

This service enables those of you who are parked where it's difficult or impossible to hear the Paddock announcements to be able to pick them up on your Mobile devices. The announcements are enabled through Mixlr - an Internet broadcast service.

Just download the Mixlr App to your mobile – then search within the app for “bemsee”
You’ll see “Bemsee Paddock Tannoy” come up – select that and you are ready to go!

Bemsee Paddock Tannoy Live

Ensure your volume is turned up or plug-in an auxiliary speaker. The only broadcasts will be Paddock Tannoy announcements which are made at the same time as the main Tannoy calls - you should hear these on your mobile with a 5 - 30 seconds delay after the main call is made, it takes that time for the broadcast to get to you via the Internet and Mobile networks. The Broadcast is continuous, so you shouldn't need to keep refreshing your device if it keeps an Internet connection. The BPT Livepage indicates that the Broadcast is live - so we've chosen not to play any annoying background music. Broadcast will remain silent until Tannoy announcements are made.

Other Ways to Keep an eye on what's on track....

Remember we are also running TSL Live Timing, also accessible via your Mobile. At some circuits there's also the option to run the Comentary Live through the TSL timing live screen – you'll find a link at the bottom of the timing screen/

The TSL Live Timing link our meetings is at www.tsl-timing.com
